New Your, Dec. 14.—The great steel gas tank of the Consolidated Gas Co. at Avenue A and Twentleth street, the largest of its kind in the world, collapsed at 5:30 o'clock Treasday afternoon. It went down with a crash and roar like a great explosion.

Masonry of grantle blocks and bricks to the height of 50 feet fell like a child's toy house of blocks, and loosened from bondage 8:00,000 gallons of water, delayed the streets and in a tear-foot titlon through the surfounding neighbor-hood. It is not known how many were killed and injured.

The dead so far known is three and the injured number 23.

The steel tank was 178 feet in diameter and 100 feet high. Rising out of the ground to a height of 50 feet was a wall of grantle and brick many feet in thickness. This was filled with \$0,000.000 gallons of water. A gang of men were at work under a foreman filling the pit to make the first "water test."

The great tank seemed to withstand beginning to gather up their tools to knock off. There were many people on the streets and crowded street cars coming and going.

Suddenly came an awful crash. The men below had scarcely time to fly from beneath the falling walls ere they were picked up by the mass of rolling water and hu led hundreds, of feet away. Into the basement, the first and second floors of factories and tenements, rushed the flood. Workman were shot out of the factor word.

Women werb washed out of the flats from the first floors and almost drowned.

Mary Ann O'Connell and her little typea-old sister Catherline were seated at the front window on the second floor of No. 385. Avenue A. Before they could turn to fee a rush of water struck them both, smashing them for the struck them both, smashing them the struck them both, smashing them half a block distant. Both were terribly in jurgers, the little one perhaps fastally.

Henry Puldner was taken up bodily and carried almost to Twenty-first street. His son was also carried out of his office by the water, but was caught in the debris and but for the timely arrival of some worknen with axes he would have been drowned.

Andrew Wendt, one of the killed, was near the base of the tank when it collapsed. He was caught by the rushing waters and borne almost an incredible distance. His mangled and almost naked body was found against an elevated railroad pillar at Twenty-first street and First avenue, more than a block away.

W. J. Logan, of the Logan iron works of Green point. L. L, the contractor who was building the tank, arrived on the seene within a few minute of the consolidated Gas Co, and said to be jointly responsible for the work with Contractor Logan, was placed under arrest. Both were charged with homicide and their ball was placed at \$10,000 each.
